StageBio

Freiburg | Your Dedicated European Histopathology Site

StageBio Freiburg delivers GLP-compliant histopathology, biomarker, and pathology services for preclinical and non-clinical studies, supporting regulatory-ready results for biotech, pharma, and CRO partners across Europe and beyond.

- **20+ Global Pathologists** Supporting Histopathology
- **20+ Years** of Experience
- **5,000+ Studies** across multiple therapeutic areas

European preclinical programs need a site that moves as fast as your timeline.

Cross-border logistics, inconsistent histology quality, or unclear pathology interpretation can stall IND-enabling studies just when regulatory clarity matters most.

StageBio's Freiburg facility is built to remove that risk. Our highly experienced histologists and board-certified veterinary pathologists deliver GLP-compliant histology, biomarker, and pathology services across toxicology, safety assessment, and IND-enabling programs, ensuring tissue findings are accurate, consistent, and defensible.

Ask Our Experts

Have you faced challenges in...

- Coordinating tissue collection, histology, and pathology for multisite studies?
- Selecting the right biomarker strategy for IHC, IF, or ISH endpoints?
- Getting regulatory-ready documentation & traceability for an upcoming IND submission?

By integrating documented workflows, advanced IHC/IF/ISH capabilities, and quantitative digital pathology, we provide:

- Clear toxicology and safety insight
- Regulatory-ready documentation and traceability
- Integrated tissue workflows from processing through archiving

The Result: Confident decisions, protected timelines, and a dedicated European site built for seamless collaboration across international programs.

StageBio

Freiburg | Your Dedicated European Histopathology Site

A dedicated European histopathology site supporting preclinical and non-clinical drug development programs.

Freiburg Facility Capabilities

GOLD | Top 5%
ecovadis
Sustainability Rating
JUL 2026

Histology & Advanced Staining

- **Histological Tissue Processing**
  - Processing, Embedding, & Sectioning/Microtomy
  - H&E & GLP-ready Special Staining
- **IHC, Multiplex IHC, IF, & ISH**
  - Biomarker Protocol Development & Validation and Method Transfer
- **Tissue Biobank Access**
  - FFPE & OCT Snap-frozen Tissue Across Human, NHP, Rat, Mouse, & Rabbit

Specialized & Pathology Services

- **Tissue Cross-Reactivity (TCR) Studies**
  - Species-relevant Tissue Panels for Therapeutic Antibody Programs
- **Digital Image Analysis**
  - Quantification for Reproducible Tissue Endpoints, Including In Vitro Histology for Organoids
- **Board-certified Pathology Review**
  - Evaluation Across Therapeutic Areas, Modalities, & Disease Indications

Quality & Regulatory Readiness

- **Documented Workflows**
  - SOP-driven Processes with Clear Separation of GLP & Non-GLP Activities
- **Sample Traceability**
  - Full Data Provenance Across the Study Lifecycle
- **Regulatory-ready Reporting**
  - Pathology Reports Structured for Regulatory Review, with Audit-ready Documentation Available on Request

Plan Early | Meet with Our Freiburg Team Today

Talk with our experts now to align tissue handling, biomarker strategy, and regulatory-ready reporting for your next study.
