

Why Leading Ocular Researchers Trust StageBio

For over 20 years, StageBio has been advancing vision science through expert pathology insight, GLP-compliant reporting, and agile scientific collaboration.

100s

Non-GLP & GLP Ocular Histopathology Studies across multiple therapeutic areas

10

Pathologists supporting the ocular service line with average 18+ years of experience

~10
PER YEAR

BCOP Studies

~10
PER YEAR

Ocular Device/Implant Studies

~20
PER YEAR

Intravitreal Injection Studies

Testimonials & Quotes

At StageBio, we understand the complexity of vision science research and the experience required to conduct ocular studies with excellence. What sets us apart from other suppliers is our industry-recognized ocular histopathology expertise and our ability to provide bespoke services for your ocular drug and device programs.

Dr. Quinci Plumlee, StageBio, Director, Pathology Solutions

WEBINARS

Accelerating Ocular Therapies with Scientific Precision

Ocular Pathology Expertise for Exploratory, Safety & Efficacy Studies

Established leaders in GLP-compliant ocular histopathology services for nonclinical research from discovery to safety assessment.

Quality Data. Reduce Risk. On Time.

Common Disease Models

- Glaucoma
- Age-Related Macular Degeneration (AMD)
- Diabetic Macular Edema
- Diabetic Retinopathy
- Dry Eye Disease
- Cataracts
- Thyroid Eye Disease
- Uveitis
- Conjunctivitis
- Amblyopia
- Presbyopia
- Strabismus

Administration Routes

- Topical (Ocular, Eyelid)
- Intracameral
- Subconjunctival
- Intravitreal
- Subretinal
- Suprachoroidal
- Sub-Tenon
- Retrobulbar

Comprehensive Services

- **Histology Capabilities**
 - Specialized Trimming
 - Embedding (Paraffin, OCT, Resin, Gelatin, & Cryo)
 - Sectioning & Staining
- **Pathology Expertise**
 - 20+ Board-Certified Veterinary Pathologists
 - Expertise Across Multi-Therapeutic Indications & Modalities
 - Data Interpretation and Peer Review
 - SEND-compliant Data Capture & Reporting
- **Molecular Services**
 - Immunohistochemistry (IHC), In Situ Hybridization (ISH), Immunofluorescence (IF)
- 250+ Antibody Biomarkers, Off-the-shelf Solutions, or Custom Biomarker Development

Regulatory Support

- GLP Regulatory Compliance

Necropsy

- On-site Pathologist Supervision & Prosectors

Custom Ocular Study Support

- Protocol Review
- Pathologist Consulting
- Peer Review
- Tailored Histology Methods
- IHC, ISH, & IF Method Development
- Bespoke Morphometric Analyses

Ocular Implants, Devices, and Surgical Techniques

- Contact Lenses
- Intraocular Lenses
- Intracorneal Implants
- Keratoprotheses
- Orbital Implants
- Scleral Buckles
- Glaucoma Drainage Devices
- Retinal Prostheses
- Laser Treatments

New Approach Methods (NAMs) Support

- Histology and pathology support for BCOP assay evaluation
